1. UNPACKING INSTRUCTIONS

Contents:
1. Cardboard box
2. Box with keypad and mouse
3. Milk analyser
4. Lactoscan MCCW
5. Box with accessories

2. SAFETY INSTRUCTIONS

1. Read this manual carefully and make sure that you understand all the instructions.
2. For safety purposes the device is equipped with grounded power cable. If there is no grounded electrical outlet where the device will be used, please, install such before using the device.
3. Place the device on a level and stable plate.
4. Connect to the electrical network in such a way that the power cable to stay away from the side for accessing the device and not to be stepped on.
5. Do not disassemble the unit in order to avoid possible electrical shock.
6. In case of malfunction contact your local dealer.
7. Handle the liquids the device works with carefully, following all the instructions for their preparation.
8. Place the switching adaptor in such a way as to be protected from overflow and spillage of liquids.

3. ASSEMBLING THE DEVICE

Open the box. Carefully take out the contents of the box.
Place the machine on a flat level surface

4. SWITCHING ON THE SYSTEM

1. Plug in the analyser power supply in one of the back panel inlets

5. Wait until the software opens

6. If everything is connected properly you should receive a “Ready to Start” message on the screen

7. Fill the glass with a milk sample and place it in the analyser, when the long hose is in the milk, the short hose is not covered in milk
8. Start a measurement by pressing the calibration name on the screen for the type of milk you are going to measure (if you are measuring cow milk, press the Cow Button).

9. When the measurement is started on the screen appears

Where:
- Position 1: The seconds left until the measurement is finished
- Position 2: Temperature of the sample
- Position 3: The calibration channel that is being used
- Position 4: Message about what calibration you are using for measurement

10. When the measurement is finished

Where:
- Position 1: Highlighted the last used calibration
- Position 2: Result collector for all the measurements done since the start of the program
- Position 3: Measure count since the start of the program
- Position 4: Archive file for the results
- Position 5: Fields for the parameter results of the last measurement

11. Continue work by placing a new sample in the glass and press the calibration buttons

12. When finished work put clean water in the glass and start cleaning by pressing the cleaning button

13. Please refer to the user manual about the proper way of cleaning the machine

**IMPORTANT**

The main reason for malfunctioning of the device is the bad cleaning of the system after making analysis. In case of malfunction due to the bad cleaning of the analyzer your guarantee is not valid anymore and any repair has to be paid.

5. TURNING OFF THE SYSTEM

1. To turn off the tablet select File -> Shutdown

2. To exit the program select File -> Exit to close the software to use the tablet

3. Turn off the analyzer from the back panel switch

*NOTE: If you have any questions about any of the procedures, please contact Milktronic LTD

6. OPTIONS AND ACCESSORIES

- Bar-code reader (USB)
- External Standard Printer
- Wireless keyboard and mouse (USB)
